PROJECTNET IS DESIGNED TO MAKE PROJECT MANAGEMENT FAST AND EASY

ALLOW OTHERS TO ACCESS YOUR PROJECT...OR SPECIFIC PORTIONS OF A PROJECT... USERS SEE WHAT YOU WANT THEM TO SEE.

Allowing people to access definable portions of a Project has never been easier. Control what they can see, if they can add information to your project, add comments, and assign tasks/deadlines.

ATTACH REFERENCE MATERIAL, DOCUMENTATION, PRODUCT SCHEDULES AND MORE...

Associating documents, files, spreadsheets, equipment schedules, shipping documents and receipts to specific aspects of a Project is quick and easy.

Create links to AutoCAD drawings and details, for rapid information retrieval.

CREATE, SEND AND TRACK RFQ'S, RFP'S AND CHANGE ORDERS

Track those pesky times, dates and deadlines with ease and confidence. Let everyone know the status of each item. Route RFP's, RFQ's and ChangeOrders through predetermined approval stops, with automatic notifications along the way.

ADD CUSTOMIZED FIELDS

With ProjectNET, you can control the fields within your database. Add fields at anytime, or change the order in which they appear. You decide what information will be kept in your database.

CALENDARS, TASKS, AND TIMECARDS

Now, all aspects of a project can be assigned to people, groups, sub-contractors... while allowing them to track their time, calendar start dates and deadlines.

PROJECT DEVELOPMENT

With ProjectNET, you can plan for the future. Simply create BOILER-PLATE design specifications, hardware schedules (door, hardware, equipment, electrical...). Now, you can check submittals for accuracy and errors; identify and approve or reject information provided by others (sub-contractors, manufacturers...).

Use these templates for FUTURE projects. Thus reducing the frustration of performing the same redundant entries on each project...**SAVING TIME & MONEY.**

PROJECT MANAGEMENT ... FAST, EASY, CONVENIENT AND COMPLETE.

ProjectNET™ is a Server Based, Browser-Accessed Project Control Management Software. This highly advanced Project Management Software is our *ultra-high end software*. Currently offered in two methods of deployment, Subscription and Site-Based.

ProjectNET™ takes Managing Projects, Documents and Calendars and Scheduling to NEW Heights. Designed to integrate, import, export or share information with other software packages. If you are unhappy with the way your existing software performs and special features currently not in our program... you can have us develop EXACTLY what you want.

- ▶ **Subscription** - we create a unique and secure ZONE on our High Speed Servers. You control the zone, who will see your information, and which users can perform which functions. We maintain your program, including backups, and remote storage.
- ▶ **Site Based** - we sell the complete server and program, ready to go...you provide the network. Or, you provide the server and we will configure and load the software, returning it to you ready to go...you provide the network.
- ▶ **StandAlone** - we can provide our products in standalone deployments on a dedicated PC or in Virtual MODE on your laptop

PROJECTNET IS AVAILABLE AT FEES YOU CAN AFFORD

OUR SOFTWARE IS DESIGNED TO PAY FOR ITSELF. WE CAN OFTEN SAVE YOU MORE THAN THE COST OF OUR SERVICE ALONE. SO WHY NOT SUBSCRIBE TODAY?
