

Here is how
SpectrumNET™
will help
you

Affordable

No hidden costs. Pay for only the modules you need and use. Low initial system cost, system maintenance, and support costs. Designed to pay for itself with increased performance, operational speed and reduced data entry times.

Management Control

Your Systems Manager has complete control over each user's access to the system, and what each user can do in the program.

Complete Accountability

All SpectrumNET software is audit friendly with extensive reporting capability.

Tailored to YOUR needs

The program can be customized to fit your organizational and operational needs

AccountNET – Accounting software with interfaces to all SG1 solutions.

PeopleNET – Personnel and Human Resource Management software.

Dear Facility Professional,

Most of us are facing budget cuts, or increased strain on our budgets. Doing more with less seems to be the trend. A greater number of facility professionals, like you, are finding help with the **SpectrumNET™** family of software solutions by The Spectrum Group.

Our Spectrum Group team has developed the **SpectrumNET™** family of software solutions to save time and money. Built on our own **SG1** programming platform, the exceptional performance of our software will allow your staff to increase their performance and professionalism while reducing the associated computer time. Avoid the high prices of Oracle and SAP based systems by using our **SG1** platform.

We are familiar with your environment and understand the complexity of day-to-day operations, and the demands it creates. With this understanding we have developed **WorkNET™**, **BizNET™**, **KeyNET™**, **ProjectNET™**, **DeveloperNET™**, **ScheduleNET™**, **PeopleNET™**, and **AccountNET™**. Now there is a program to manage and control your projects and operations with complete accountability. The Spectrum Group is your single-source program provider to manage and control you key system with complete accountability. Medical centers, hospitals, service businesses, educational institutions – from the K-12 to the University level - have discovered the benefits of **SpectrumNET™**. **SpectrumNET™** makes it easier, and less costly, to effectively manage and control many aspects of their operations...and these same benefits can be put to work for you.

SpectrumNET™ is designed to operate in a web environment. This cutting-edge, Software-As-A-Service (SAAS) system will interface with all popular operating and network systems using just a web browser. Additionally, **SpectrumNET™** includes a Human Resource database, including an optional Photo ID and eSignature interface, for complete personnel management control. **SpectrumNET™** is positioned to optimize your existing resources and staff, and provide a single, consistent method for managing all your operational and control needs.

The unique modular design of **SpectrumNET™** software packages makes all of our programs affordable. With no hidden costs, one annual fee covers licensing, upgrades, enhancements, support, and any emergency situations you may encounter.

Our **SG1** Technology Team can create interfaces and integration utilities to allow for the transfer of information between multiple systems, thus reducing the time spent on data entry and eliminating record mismatch errors. Our Spectrum Group team can also convert the data from your legacy databases into your **SpectrumNET™** programs. If you need a system designed to your exacting specifications...our **SG1** team can build it for you.

Call for an initial consultation, and we can discuss the benefits of the **SpectrumNET™** solutions for your business or facility.

Sincerely,

Rick Fish

R.C. "Rick" Fish
